MnM

Innovate . Build . Deliver

Empowering students globally without barriers

admin@mnmworks.xyz

01

ABOUT

Pure Learning. *Zero Pressure.*

MnM is a non-profit organisation dedicated to empowering students globally without barriers. Our mission is to build a student network focused on privacy and learning. No hidden charges, no unnecessary pressure. Just learning, innovation, and growth, entirely free of cost.

We believe that the best ideas emerge when students are given freedom, support, and the right environment to experiment, fail, and grow.

PRINCIPLE 01

Privacy First

Your data belongs to you. We build a safe, secure space for every participant.

PRINCIPLE 02

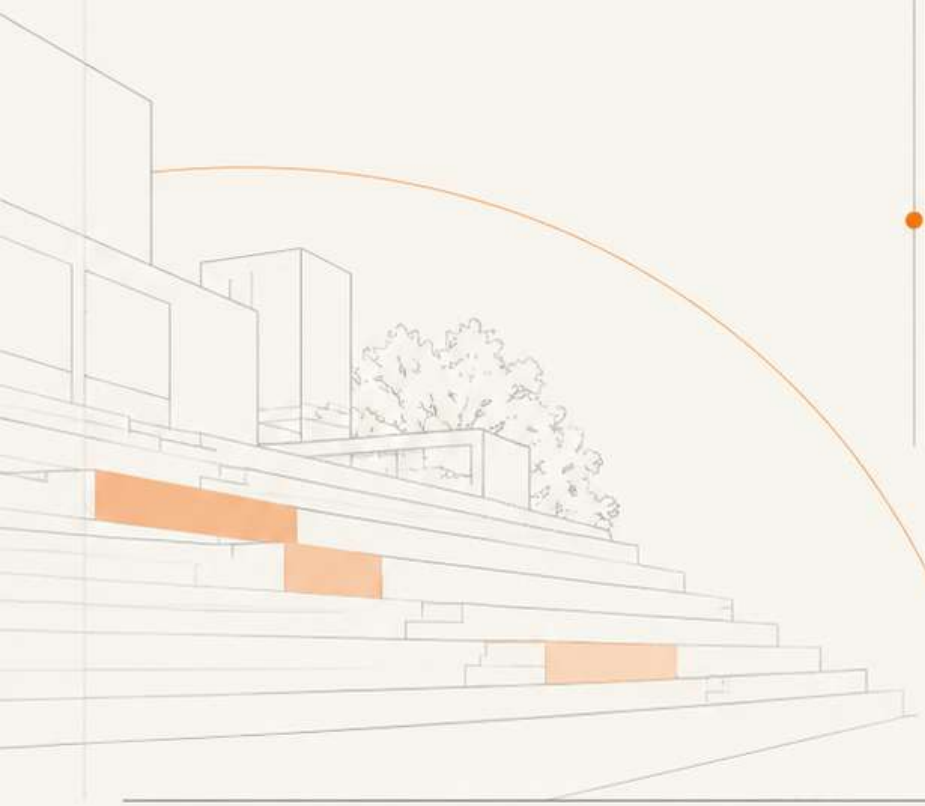

100% Free

No paywalls, no hidden charges. Knowledge should be accessible to all.

PRINCIPLE 03

Healthy Innovation

A supportive environment designed for constructive feedback and growth.

VISION

Building *Tomorrow.*

A roadmap for expanding impact, nurturing talent, and democratizing access to quality technology education across the globe.

i.

Global Chapters

Expanding our student network to universities worldwide, creating local hubs of open-source innovation. Each chapter operates independently while contributing to a shared knowledge base that benefits the entire community.

ii.

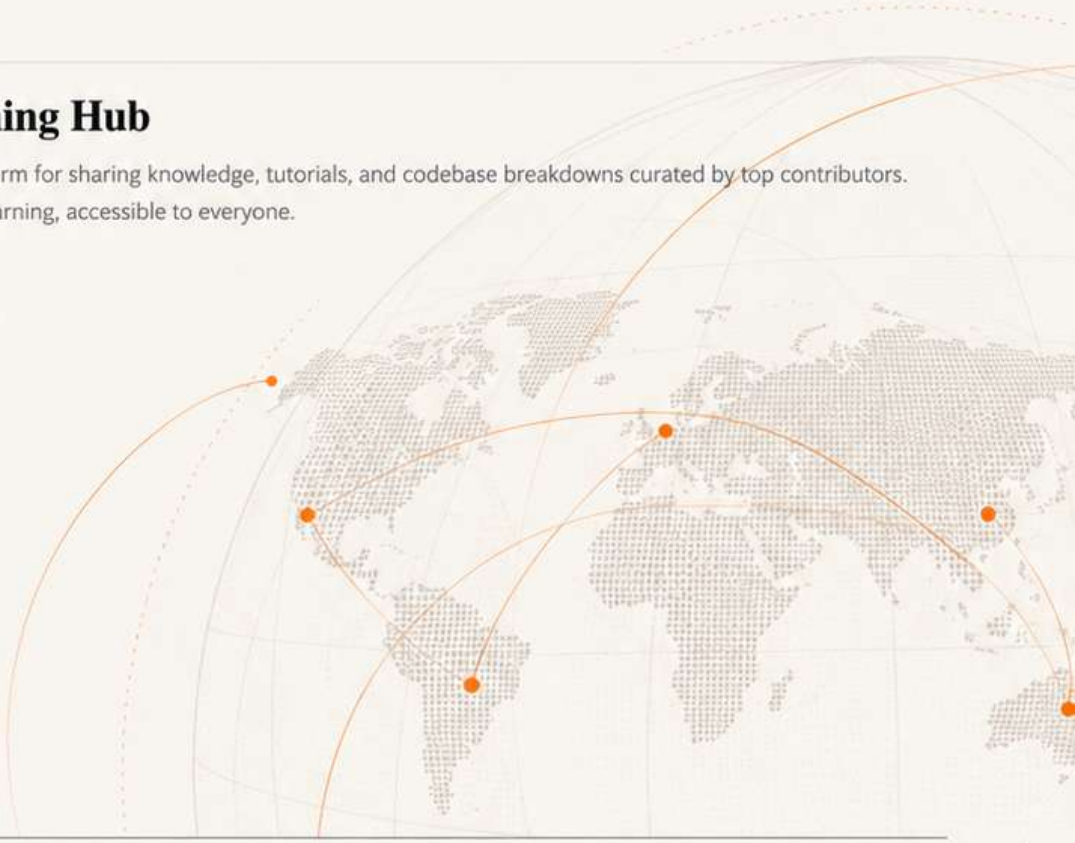

Incubation Program

Providing resources, mentorship, and infrastructure to help student projects evolve into real-world solutions. From prototype to production, we support the journey every step of the way.

iii.

Open Learning Hub

A decentralized platform for sharing knowledge, tutorials, and codebase breakdowns curated by top contributors. Community-driven learning, accessible to everyone.

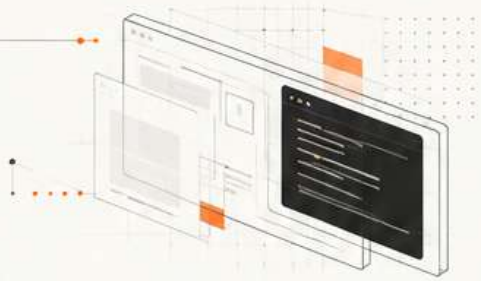

SERVICES

What We *Build.*

03

01

Frontend Development

Modern, responsive interfaces built with React, Next.js, and Tailwind CSS. Pixel-perfect execution with performance at the core.

02

Backend Engineering

Scalable server architecture using Node.js, Python, FastAPI, and PostgreSQL. Built for reliability and long-term growth.

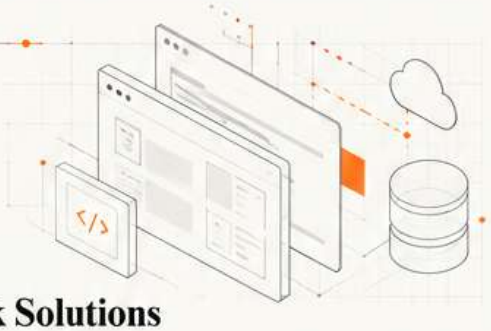

03

AI Infrastructure

Machine learning pipelines, model deployment, and intelligent automation systems. Production-grade ML operations.

04

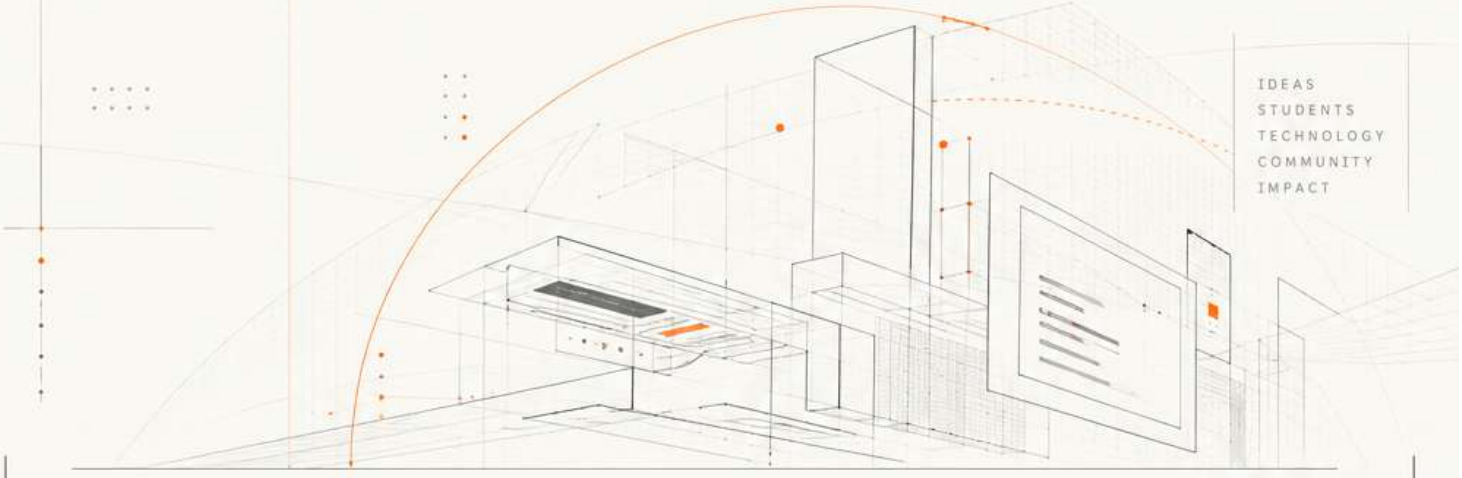

Full-Stack Solutions

End-to-end application development with payment integration and production deployment. Complete digital products.

PRO BONO

We provide free websites and infrastructure to underprivileged businesses, helping them establish a digital presence at no cost.

IMPACT

Numbers That *Speak.*

04

Our impact is measured not just in metrics, but in opportunities created. Every number represents real students gaining real experience on real projects.

EVENTS

05

Community *in Action.*

From hackathons to tech camps and innovation challenges, MnM has consistently delivered high-impact events that bring together students, mentors, and industry leaders.

Our community supports hackathon-winning ideas by contributing development resources to bring them to production.

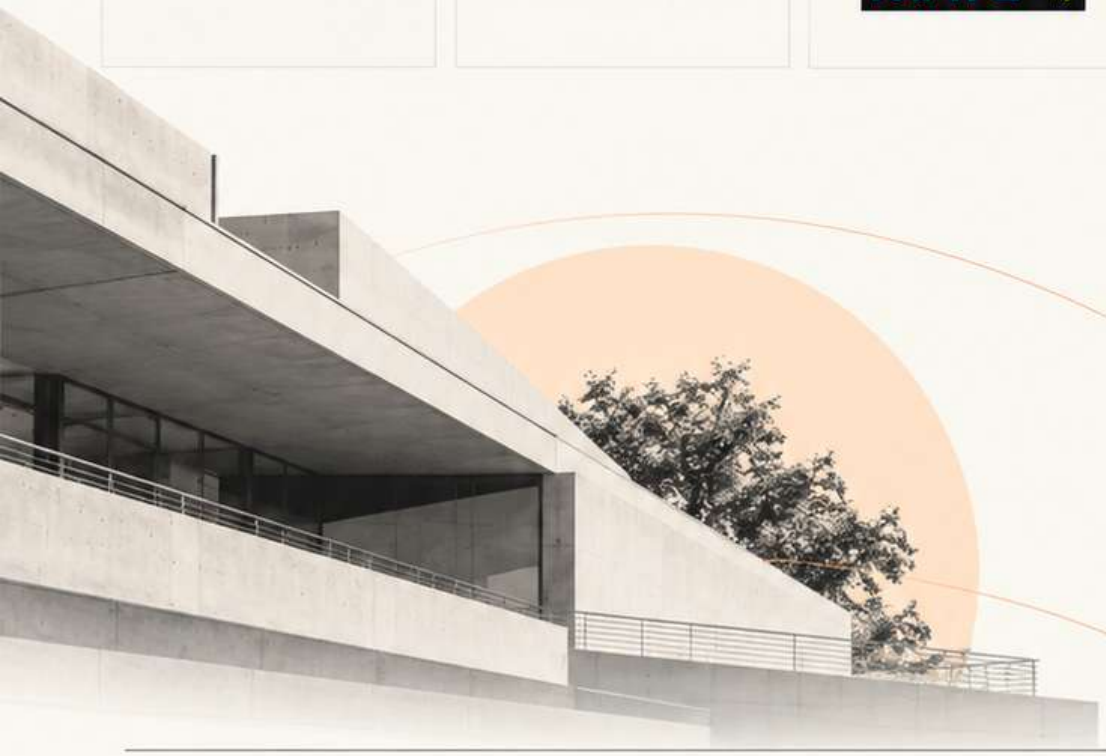

PARTNERS

06

Backed by *the Best.*

Supported by industry leaders on both monetary and non-monetary terms. Our partners share our commitment to empowering the next generation of builders.

CAREERS

07

Grow *With Us.*

Join a community where your growth is the priority. Our internship program offers hands-on experience, mentorship, and tangible outcomes that strengthen your professional profile.

What You Gain

1. Practical experience on real, industry-specific projects
2. Open-source exposure and portfolio-building opportunities
3. Collaboration with a growing technology team

Professional Credentials

4. Professional custom email for LinkedIn verification
5. Certificate of completion with physical copies delivered to eligible recipients

SELECTIVE RECOGNITIONS

Physical certificates, hard-copy appreciation letters, and branded merchandise are selective recognitions based on attendance, consistency, quality of work, and available opportunities. Exceptional performers may also be considered for formal opportunity letters.

Recruitment programs and Campus Ambassador positions available at nmmworks.xyz/careers

COMMUNITY

08

More Than *Code.*

Students Building Brighter Tomorrows

Beyond software development, MnM is committed to creating meaningful impact through community-driven initiatives that reach beyond the screen.

Initiative i.

01

Open Source Contributions

Interns work on genuine, industry-specific projects that solve real problems. Every contribution is meaningful, every commit counts toward building something that matters.

REAL PROJECTS
REAL PEOPLE
REAL IMPACT

Initiative ii.

02

Social Impact

Free websites and digital infrastructure for underprivileged businesses. We believe technology should be a bridge, not a barrier, to economic opportunity.

THE PEOPLE BEHIND MnM

Built by Students.
Driven by Purpose.

MnM began with two students who wanted to make learning, collaboration, and meaningful work easier to access.

01

ADITYA VERMA

FOUNDER

BCA · LOVELY PROFESSIONAL UNIVERSITY

I started MnM because I wanted to contribute to open source, but finding a clear path as a beginner was harder than it should be. I wanted a place where students could learn by doing, join hackathons, work on real problems, and build a public record of their work without leaving gaps in their early career journey. MnM is my way of making that path easier to find for others.

02

MANIKA KUTIYAL

CO-FOUNDER

BCA · ETERNAL UNIVERSITY

I wanted to help smaller startups and underserved businesses get the visibility and digital support they often struggle to access. I also believe college should be more than lectures and exams. Students need chances to work with different people, collaborate, and solve real problems as a team. Through MnM, I want to connect student talent with businesses that can benefit from it, while helping students grow through meaningful work.

A student-led community, *built around learning by doing.*

Thank You.

Join us in building something that matters. We are always looking for passionate students, collaborators, and partners.
